Design Engineer with 3+ years bridging UX/UI design and front-end development, specializing in AI-integrated tools and workflow automation. Currently leading AI design for 40+ client accounts while building production-ready internal tools to scale design and content workflows.

EXPERIENCE

Design Engineer & AI Designer
Aug 2025 – Present

Market Mentors LLC · Springfield, MA

- Directed and produced a **15**-second AI-generated TV spot using Google Veo that aired during Winter Olympics coverage on broadcast and CTV
- Led UX/UI product page redesign for Vlier (Hutchinson Aerospace), restructuring IA and CTA hierarchy around CAD downloads, the highest-value conversion action
- Manage design systems and atomic design standards across **40+** client accounts spanning social, print, and digital

UX Designer & Web Developer
Apr 2024 – Jun 2025

Metropolitan YMCA of New Jersey · Maplewood, NJ

- Led UX analysis and CMS development for **4+** childcare and event sites, improving user flow and content organization
- Built **2** websites end-to-end from stakeholder interviews and content strategy through launch
- Standardized responsive templates and reusable content blocks across the CMS, reducing page build time for the team

Multimedia Designer & WordPress Developer
Aug 2023 – Apr 2024

The Gazelle Group · Princeton, NJ

- Designed branded assets for ESPN-affiliated tournaments, including media kits, digital ads, and live event graphics
- Created and managed real-time social media content during live tournament coverage to drive fan engagement
- Built reusable UI components and templates across multiple WordPress properties to streamline site updates and ensure brand consistency
- Conducted A/B testing on site components and call-to-actions to optimize user conversion paths

PROJECTS

AI Design Proofer `React · TypeScript · Gemini API`

Internal tool that automates QA for design deliverables—checking brand consistency, copy errors, and layout issues across assets before client review, effectively replacing a manual proofing workflow.

Social Content Generator `React · TypeScript · Anthropic API`

Generates **30+** export-ready social post designs from a single strategy document, handling copy variations, format sizing, and brand template application
